Slide 1 – Title

KIKI Agent™

Autonomous LTV Campaign Execution Platform

Tagline: Your £149 order becomes a £639 signal.

Slide 2 – The Problem: Ad Platforms Are Flying Blind

Every advertiser sends raw transaction values to ad platforms. The platform optimises toward a £149 order, never knowing that customer is worth £639 over 90 days.

The result:

- CPA optimisation becomes a race to the bottom
- Best customers are undervalued by 3–4×
- Lookalike audiences are built on the wrong signal
- 68% of D2C brands report declining ROAS (2025–2026)

Ad platforms optimise toward what you send them. If you send raw orders, you get raw results.

Slide 3 – The Solution: LTV-Enriched Bidding

KIKI Agent intercepts every conversion server-side, predicts 90-day LTV in 38ms, and enriches the signal.

Metric	Before KIKI	With KIKI
Signal sent to Meta	£149 (raw order)	£639 (predicted LTV)
Bid optimisation target	Low-value buyer	High-LTV customer
Lookalike audience seed	One-time purchaser	Repeat buyer profile
ROAS trajectory	Declining	Improving

It's not a bidder. It's an execution platform.

Slide 4 – How It Works

Key differentiator: Fraud detection runs *before* enrichment. Competitors enrich first and detect fraud later (or never) — their models learn to optimise toward bots.

Slide 5 – Product: 42 Dashboard Surfaces

KIKI provides a full command centre, not an API:

Group	Surfaces
Overview	Command Centre, Campaigns, Signals, Agents, Guides
Intelligence	SyncBrain AI Chat, Analytics, Intelligence, Competitive, MMM, B2B, Scenarios
Finance	Wallet, Billing, P&L, Margins, Influencers
Operations	OaaS, Workflow, Reports, Warehouse, Fraud, Anomaly, Commerce, Competitor
CRM & Content	CRM, Creative Library, Creative AI, Creative Attribution

Each surface is fully built, live, and responsive (320px–1920px).

Slide 8 – Market Opportunity

Metric	Value
Global digital ad spend (2026)	\$745B
AI-powered ad optimisation	\$4.7B (CAGR 32.4%)
Server-side CAPI/enrichment	\$1.1B (CAGR 41.2%)
KIKI's SAM	\$3.4B
Target customers	38,700 mid-market D2C + agencies

Key tailwinds:

- Meta CAPI is mandatory — every advertiser needs server-side events
- Privacy regulation killed third-party signals — first-party LTV is the new frontier
- ROAS compression is driving demand for optimisation technology
- AI-native ad tech is the fastest-growing segment in marketing software
